A Sustainable Culture to Support Industry

The Department of Planning, Industry and Environment (DPIE) welcomes innovation and reform to support a thriving and sustainable construction industry.

An endorsed set of cultural standards will allow us to support industry to thrive as DPIE continues to plan and deliver a large pipeline of valuable infrastructure projects for the people of New South Wales.

We have an opportunity to make long lasting change, and I look forward to seeing the efforts of the taskforce take hold.

Jim Betts

Secretary

NSW Department of Planning, Industry & Environment
